premium finish

Custom Finishes

Winscape™ offers custom **Powdercoat** and **PVD** finishes.

Powdercoat: Powdercoat finishes are used in areas that are exposed to high traffic, harsh weather, and/or chemicals. Custom Powdercoat does carry a set-up charge, but there is no minimum quantity.

PVD: For extreme conditions PVD finishes offer higher durability and adhesion than powdercoat. PVD finishes available over aluminum fixtures only. Limited colors available, contact factory for details.

Slight variation in color and luster may be present in these examples due to the limitations in the reproduction process. For accurate color verification samples please request a Winona Lighting finish chip from your sales representative.
